Hi Steve,

Passing along this IC Water information FYI. GCWW used this application to track the WV spill contamination as it made its way toward their intake.

ER Team,

See message below and attachment. Have any of you been involved with this tool in the past?
Does anyone want to follow-up with Tommy Dewald?

All –

I'm forwarding a successful application of NHDPlus in water-related emergency response and, also, asking if you all have a connection in the Water Security Division who might be interested in knowing about this work.

Thanks in advance,

Tommy

Tommy,

Our new contract with DTRA includes migration to NHDPlus version 2 – it will happen sometime this year.

We have not any work with the Water Security Division lately so my contacts are limited.

Jeff Simley asked for some more information about this – attached is what I sent him.

Regards,

Bill

Hi Bill,

That's great news!

The EPA Water Security Division might be interested in this successful application as well. Do you have a contact there still?

Have you migrated ICWater to NHDPlus V2 yet?

Thanks for the note.

Tommy

Tommy

Just wanted to let you know that ICWater was used in the response to the West Virginia chemical spill by both DTRA and the Great Cincinnati Water Works (see message below).

I thought you might be interested in the use of this tool (with good results) during an emergency.

Subject: Spill update

Bill,

Sorry for the delay in giving updates. We have seen the bulk of the spill pass our intake now. We've still got a lot more samples to run and QC but so far, we have a good picture of the peak at three locations. The peak as it passed here was between noon and 1 pm yesterday. The two good IC Water runs based on Huntington and Portsmouth data predicted the peak at 1PM and 10:30 AM respectively. Even the leading edges were relatively close.

We have plenty to discuss and share with you and your team, but for now I just have one quick

question: Where do I get the latest version of IC Water? The CBRNE website doesn't seem to work with the link I have.

Thanks again for all your help!
